

Environmental policy for the QleanAir Group

QleanAir clean indoor air through high quality solutions, which are environmental friendly, energy efficient and recyclable. In our aim and passion to help our customers to clean the indoor air the environmental aspect is a given and integrated part of our daily operations.

In our work with continuous improvements and prevention to minimize pollution generation we commit ourselves to the following:

1. QleanAir shall follow and fully comply with existing environmental legislation.
2. QleanAir shall work in a preventive way to minimize the generation of pollutions.
3. QleanAir shall as far as possible use components and material that can be reused or recycled.
4. QleanAir shall in cooperation with partners and suppliers continuously adopt its existing products to the environment by choosing more environmental friendly components and production processes.
5. QleanAir shall when developing new products take great consideration to the environmental consequences they may have.
6. QleanAir shall through a continuous improvement process secure that the company lower the environmental consequences of its products and operations.
7. QleanAir shall communicate and guide its customers in how they by using QleanAir products can lower their environmental footprint.
8. QleanAir environmental policy shall be well known understood and communicated to all employees within the QleanAir Group.
9. QleanAir shall from an environmental aspect optimize the life cycle of its products, from production to scrapping.
